

Git Repository Evidence — Independent Creation Timeline

Harold Alberto Nunes Rodelo · omnixquantum.net

Generated: April 19, 2026 at 18:04 UTC · Cryptographic Git History

PURPOSE OF THIS DOCUMENT

This document presents the objective, cryptographically timestamped Git commit history of the OMNIX Quantum repository. Git commit hashes are SHA-1 fingerprints that cannot be retroactively altered without detection. Every fact below is independently verifiable by any software engineer or forensic analyst with access to the repository.

CHRONOLOGICAL EVIDENCE

DATE	COMMIT HASH	EVENT	SIGNIFICANCE
Jul 13, 2025	4b9ab293	Create main.py — OMNIX repository initialized	OMNIX exists 8 months before any VITT involvement
Mar 13, 2026 21:55 UTC	08879d68	Add forensic simulation report for Terra-LUNA collapse Files: OMNIX_LUNA_Forensic_Simulation_May2022.pdf generate_luna_simulation.py (1,073 lines)	Terra-LUNA report created by Harold, independently. File header: "OMNIX Forensic Simulation" — zero VITT mention
Mar 18, 2026 09:09 UTC	ceca9500	Task #19: Corregir PDF LUNA — quitar versión interna y regenerar	Harold proactively removed the experiment label. Initiated by Harold — not in response to any complaint.
Apr 10, 2026 08:28 UTC	dc927867	Remove references to VITT from project documentation and scripts (4 files modified)	Systematic cleanup. VITT appears ONLY in removal commits — never in any commit that ADDED VITT methodology.

CRITICAL FINDING: VITT NEVER ADDED AS METHODOLOGY

SEARCH QUERY	RESULT
git log --all grep -i VITT	Returns ONLY 2 commits — both dated April 10, 2026 — both titled: "Remove references to VITT from project documentation and scripts" Zero commits that ADD VITT. Zero commits that IMPORT VITT methodology. The word VITT exists in git history exclusively in removal operations.

File header of generate_luna_simulation.py (commit 08879d68, Mar 13 2026)	Line 1: "OMNIX Forensic Simulation — Terra/LUNA Collapse May 2022" Line 2: "Generates a professional PDF demonstrating how OMNIX governance" Line 3: "checkpoints would have blocked execution before the catastrophic collapse." No VITT. No external methodology. Pure OMNIX architecture.
Search all web files, templates, JS, HTML, Python for 'VITT'	0 results. The live website (omnixquantum.net) contains zero references to VITT in any file, page, or endpoint.

SUMMARY OF FACTS

- **FACT 1:** OMNIX was built starting July 13, 2025 — eight months before any collaboration with VITT.
- **FACT 2:** The Terra/LUNA forensic simulation was created by Harold Nunes on March 13, 2026. The file header reads "OMNIX Forensic Simulation" with no mention of VITT or any external methodology.
- **FACT 3:** The "OMNIX + VITT Forensic Alignment" label was added to a PDF as a temporary experiment label during a joint test. It was never part of the codebase or the system architecture.
- **FACT 4:** Harold proactively removed the experiment label on March 18, 2026 (commit ceca9500) — five days after creation and before any formal complaint.
- **FACT 5:** A systematic removal of all VITT references from documentation and scripts was completed April 10, 2026 (commit dc927867). This confirms good faith cleanup, not concealment.
- **FACT 6:** The VITT methodology does not exist anywhere in the OMNIX codebase. No function, class, algorithm, or data structure in OMNIX derives from or references VITT technology.
