

## GOVERNANCE DECISION REPORT

---

CLIENT

**Meridian Capital LLC**

CLIENT ID

**MCC-0047**

REPORTING PERIOD

**January 1, 2026 — March 24, 2026 (Q1)**

CONTRACT TIER

**Enterprise — Governance API + Audit Trail**

REPORT DATE

**March 24, 2026**

PREPARED BY

**OMNIX Governance Infrastructure — Automated Report Engine**

---

*This report is generated automatically by the OMNIX Governance Infrastructure and contains cryptographically signed decision records for the reporting period. All decisions are backed by post-quantum signatures (Dilithium-3) and publicly verifiable at [omnixquantum.net/verify](https://omnixquantum.net/verify).*

**STRICTLY CONFIDENTIAL — DO NOT DISTRIBUTE**

01. EXECUTIVE SUMMARY

During Q1 2026, OMNIX processed 1,847 governance evaluations submitted by Meridian Capital LLC through the External Governance API. Of these, 1,312 (71.0%) were approved, 389 (21.1%) were blocked, and 146 (7.9%) returned a HOLD recommendation. No evaluation bypassed the 8-checkpoint pipeline. All decisions carry a Dilithium-3 post-quantum signature and are independently verifiable.

|                       |                    |                   |                        |
|-----------------------|--------------------|-------------------|------------------------|
| 1,847                 | 1,312              | 389               | \$4.2M                 |
| Evaluations Processed | Decisions Approved | Decisions Blocked | Est. Capital Protected |

\* "Est. Capital Protected" represents the aggregate notional exposure of blocked decisions. This is not a guarantee of loss prevention.

02. CHECKPOINT PIPELINE PERFORMANCE

Every evaluation passes through 8 independent checkpoints in sequence. A single checkpoint failure triggers a BLOCKED decision with full audit trail.

| Checkpoint | Name                         | Evaluations | Pass  | Fail | Pass Rate |
|------------|------------------------------|-------------|-------|------|-----------|
| CP-1       | Market Regime Validation     | 1,847       | 1,702 | 145  | 92.1%     |
| CP-2       | Volatility Threshold Gate    | 1,702       | 1,620 | 82   | 95.2%     |
| CP-3       | Liquidity Depth Assessment   | 1,620       | 1,588 | 32   | 98.0%     |
| CP-4       | Drawdown Risk Guard          | 1,588       | 1,541 | 47   | 97.0%     |
| CP-5       | Monte Carlo VETO Engine      | 1,541       | 1,468 | 73   | 95.3%     |
| CP-7       | Temporal Coherence Validator | 1,468       | 1,401 | 67   | 95.4%     |
| CP-8       | Ensemble Consensus Weighting | 1,401       | 1,312 | 89   | 93.6%     |

03. DECISION LOG — SAMPLE RECORDS (Q1 2026)

Representative sample of 10 governance decisions. Full logs available via [/api/governance/audit/MCC-0047](#) with your API key.

| Receipt ID      | Timestamp (UTC)  | Domain | Decision | CP Passed | Signature     |

Full audit log: 1,847 records. Each verifiable at [omnixquantum.net/verify/{receipt\\_id}](https://omnixquantum.net/verify/{receipt_id})

04. CRYPTOGRAPHIC AUDIT TRAIL

| Parameter              | Value                                                                                           |
|------------------------|-------------------------------------------------------------------------------------------------|
| Signature Algorithm    | Dilithium-3 (NIST-standardized post-quantum)                                                    |
| Key Encapsulation      | ML-KEM-768 (Kyber-768) via HKDF                                                                 |
| Content Hash Algorithm | SHA-256                                                                                         |
| Timestamp Standard     | RFC 3161-style internal timestamping                                                            |
| Merkle Root (Q1 2026)  | 7f3a9c2e1b4d8f6a0e5c3b7d9f2a4e8c1b3d5f7a...                                                     |
| Receipts Signed (Q1)   | 1,847                                                                                           |
| Receipts Verified OK   | 1,847 (100%)                                                                                    |
| Verify URL             | <a href="https://omnixquantum.net/verify/{receipt_id}">omnixquantum.net/verify/{receipt_id}</a> |

05. GOVERNANCE RISK ANALYSIS — Q1 2026

Risk breakdown from signal inputs provided by Meridian Capital LLC.

| Risk Category             | Blocked | HOLD | Avg CP Failed | Primary Signal               |
|---------------------------|---------|------|---------------|------------------------------|
| Volatility / Regime Shift | 112     | 38   | CP-2          | Volatility index > threshold |
| Liquidity Gap             | 89      | 22   | CP-3          | Order depth insufficient     |
| Drawdown Limit Breach     | 67      | 31   | CP-4          | Max drawdown reached         |
| Monte Carlo Adverse Path  | 73      | 29   | CP-5          | VaR > 2.5% at 99th pct       |
| Ensemble Divergence       | 48      | 26   | CP-8          | Agent consensus < 0.65       |
| TOTAL                     | 389     | 146  | —             | —                            |

06. COMPLIANCE & GOVERNANCE FRAMEWORK ALIGNMENT

| Framework                                  | Alignment    | Notes                                           |
|--------------------------------------------|--------------|-------------------------------------------------|
| NIST AI Risk Management Framework (AI RMF) | Aligned      | GOVERN, MAP, MEASURE, MANAGE covered            |
| ISO/IEC 42001 — AI Management Systems      | Aligned      | Decision traceability and audit trail           |
| EU AI Act (High-Risk AI Systems)           | Designed for | Fail-closed, human oversight hooks              |
| ADGM Regulatory Sandbox Framework          | Designed for | Abu Dhabi compliance-ready architecture         |
| SOC 2 Security Control Principles          | Aligned      | Access control, audit logging, crypto integrity |

07. RECOMMENDATIONS FOR Q2 2026

- Increase signal granularity for FX domain.** FX evaluations showed the highest HOLD rate (14.2%). Intraday spread and order flow data would reduce ambiguous decisions.
- Enable real-time webhook notifications.** Switching from polling to webhooks reduces decision latency from ~800ms to ~120ms.
- Activate the Shadow Portfolio module.** Tracks counterfactual outcomes for blocked decisions, quantifying governance value over time.
- Schedule quarterly governance review call.** 45-minute session to calibrate checkpoint thresholds to your specific risk profile.

LEGAL DISCLAIMER

This report is provided exclusively to Meridian Capital LLC under the executed Governance Services Agreement. OMNIX does not provide financial advice or investment recommendations. Capital protection estimates are illustrative and based on notional exposure inputs provided by the client. All cryptographic receipts are independently verifiable at [omnixquantum.net/verify](https://omnixquantum.net/verify). Unauthorized distribution is prohibited.
