Matter	IP Ownership Dispute — OMNIX Decision Governance Infrastructure
Claimant	Harold Alberto Nunes Rodelo, Founder & CEO, OMNIX QUANTUM LTD
Respondents	Mushtaque Ahmed Rajput (VITT Protocol) & Jorge Andrés Charlin Mardones
Forum	UK IPO Mediation Service
Prepared	April 2026
Contents	17 email screenshots + Terra/LUNA Forensic Report text exhibit

■ **LEGAL NOTICE:** This document is submitted as evidence to the UK IPO Mediation Service. All contents are true and accurate to the best of the declarant's knowledge. Unauthorised reproduction or distribution is prohibited.

EXECUTIVE SUMMARY — KEY FACTS

1. Independent Development

OMNIX Decision Governance Infrastructure was developed independently by Harold Alberto Nunes Rodelo. All core architectural elements — fail-closed pipeline, sovereign gate logic, PQC-signed receipts — predate any contact with Mushtaque Ahmed Rajput or Jorge Andrés Charlin Mardones.

2. Unsolicited Contact

Mushtaque Ahmed Rajput initiated unsolicited contact with Harold Nunes. At no point did Harold seek, request, or adopt VITT Protocol methodology into OMNIX architecture.

3. Smoking Gun — March 24, 4:29 AM Email

Mushtaque explicitly wrote: 'I just need the written record on my end so our IP trail is clean going into April.' This constitutes an unambiguous admission of intent to manufacture an artificial IP trail before April investor activities — not a good-faith IP claim.

4. Written Acceptance of OMNIX Independence — March 25, 3:31 AM

Mushtaque explicitly accepted Harold's position in writing: 'I fully appreciate the strategic need to keep OMNIX Quantum's architecture and IP independent.' This acceptance was voluntary and unequivocal.

5. Escalation Despite Acceptance

Only 46 minutes after accepting independence (3:31 AM), Mushtaque sent a FORMAL NOTICE at 4:17 AM on March 25 with Jorge Charlin copied — a coordinated escalation immediately contradicting his acceptance.

6. The Terra/LUNA Report

The forensic simulation report (March 13, 2026) was an exploratory demonstration generated by OMNIX and shared with Mushtaque. The VITT references in that document were included by Harold as a courtesy reference to ongoing exploratory discussions — not as an architectural integration. Mushtaque's prior email on March 14 demanding IP ownership predates any claim that OMNIX 'incorporated' VITT.

7. Charlin's Coordinated Claim

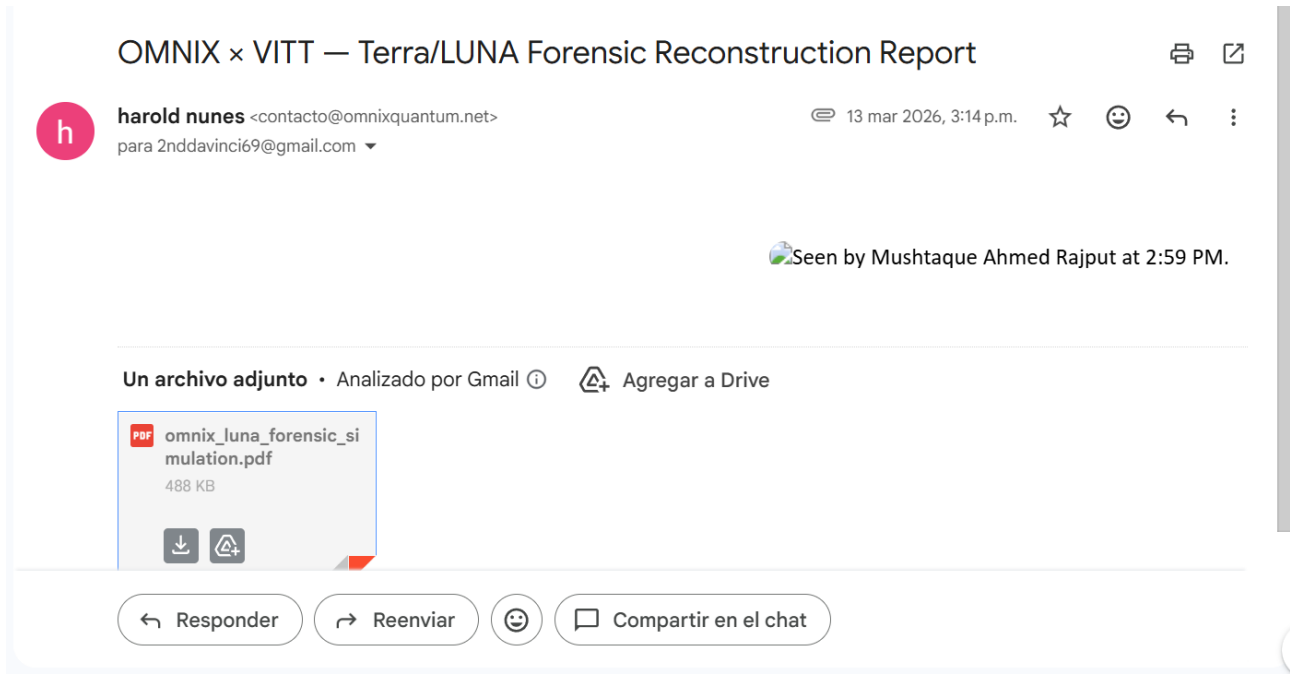

Jorge Andrés Charlin Mardones wrote independently on March 26 making the same demands — citing the same Terra/LUNA report. This coordination between Mushtaque and Charlin demonstrates a joint campaign rather than

independent good-faith IP concerns.

SECTION 1 — TERRA/LUNA REPORT SHARED WITH MUSHTAQUE (March 13, 2026 — 3:14 PM)

Date/Time: 13 March 2026, 3:14 PM — **From:** harold nunes **To:** Mushtaque Ahmed Rajput

Harold shares the OMNIX × VITT Terra/LUNA Forensic Reconstruction Report with Mushtaque. This was an exploratory courtesy document. The email confirms Mushtaque had 'Seen' it by 2:59 PM, establishing he received it directly from Harold — not that he authored or contributed to the methodology.

KEY POINT: The Terra/LUNA report was generated and shared BY HAROLD to Mushtaque as an exploratory demonstration. Mushtaque received it — he did not author or contribute to it. Any VITT references in it were included by Harold as courtesy mentions of ongoing discussions, not as a formal architectural integration. Mushtaque's March 14 IP demand came the very next day.

SECTION 2 — FIRST FORMAL IP CLAIM BY MUSHTAQUE (March 14, 2026 — 6:17 PM)

Date/Time: 14 March 2026, 6:17 PM — From: Mushtaque Ahmed Rajput To: Harold Nunes

Subject: 'Formal Statement of IP Ownership — VITT Protocol Integration in OMNIX Framework'. One day after receiving the Terra/LUNA report, Mushtaque sends a formal IP ownership claim. This sequence — receive exploratory report → immediately send formal IP demand — reveals the strategy.

Formal Statement of Intellectual Property Ownership & Role Clarity - OMNIX Infrastructure. External Recibidos x

×

Dear Harold Nunes,

I am writing to formally clarify my role and the ownership of the core methodologies within the OMNIX framework as we approach the Dubai launch. I am sending this now to ensure that our collaboration starts on a transparent and legally secure foundation for all parties involved before the global unveiling in Dubai.

As the sole originator of the **Mushtaque Ahmed Rajput Mirror-Script Protocol** and the primary provider of the **Forensic Benchmarks** (including the LUNA T-6h validation), I wish to state the following:

- Ownership of Intellect:** My ability to reconstruct 7 global writing systems (covering 160+ countries) in mirror-script is a unique human-centric diagnostic tool. This is my intellectual property (IP) and the 'Sovereign' foundation of the VITT standard.
- Role as Independent Auditor:** While I provide the benchmarks that secure OMNIX, I operate as the independent 'Master of Logic'. My language-independent forensic capability is the ultimate 'fail-safe' for the system.
- Family & Rights Protection:** I have documented my methodologies and provided them to international scholars (like Mounir Akarkach) for analytical review. All licensing, royalties, and financial benefits arising from the use of my Mirror-Script Protocol and Benchmarks are legally tied to me and my designated heirs (family).

I look forward to the success of the Dubai launch and expect our partnership to reflect the high value of the unique security I bring to this infrastructure.

With regards,

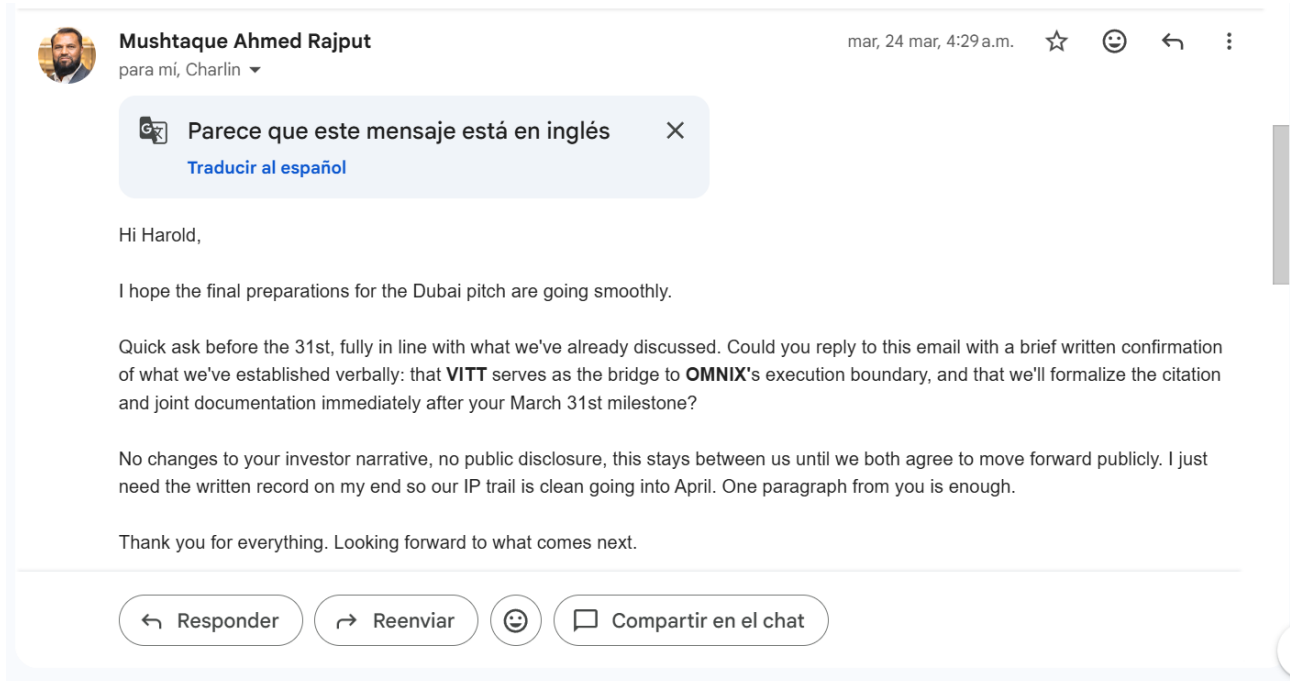

Mushtaque Ahmed Rajput
Founder & Co-Author, VITT Protocol (**OMNIX Infrastructure**)

KEY POINT: Mushtaque's formal IP claim came within 24 hours of receiving the Terra/LUNA exploratory report. He had never previously asserted formal IP ownership. This reactive pattern demonstrates opportunistic IP construction, not a pre-existing good-faith claim.

SECTION 3 — EXPLICIT "IP TRAIL" REQUEST (March 24, 2026 — 4:29 AM) — SMOKING GUN

Date/Time: 24 March 2026, 4:29 AM — **From:** Mushtaque Ahmed Rajput **To:** Harold Nunes + Charlin

Mushtaque asks Harold for a written confirmation before March 31 to 'keep the IP trail clean going into April.' He adds: 'No changes to your investor narrative, no public disclosure, this stays between us.' This email is the central smoking-gun document: explicit admission of intent to manufacture an artificial IP trail before Harold's investor activities.

SMOKING GUN — EXACT QUOTE: "I just need the written record on my end so our IP trail is clean going into April. One paragraph from you is enough." This is not a good-faith IP claim. It is an explicit request to create a fabricated paper trail timed to coincide with Harold's March 31 investor pitch. The phrase 'stays between us' confirms the concealment intent.

SECTION 4 — HAROLD DECLINES — OMNIX INDEPENDENCE MAINTAINED (March 24, 2026 — 6:46 PM)

Date/Time: 24 March 2026, 6:46 PM — From: harold nunes To: Mushtaque Ahmed Rajput

Harold responds to the March 24 request, clearly and professionally declining to provide any written confirmation of VITT integration. He states: 'I need to keep OMNIX Quantum's architecture and IP clearly defined and independent.' Any potential future alignment would require investor alignment first.

harold nunes <contacto@omnixquantum.net>
para Mushtaque, Charlin ▾

mar, 24 mar, 6:46 p.m. ☆ 😊 ↩ ⋮

Hi Mushtaque,

Thanks for the note — aligned with the direction we've been discussing.

At this stage, I need to keep OMNIX Quantum's architecture and IP clearly defined and independent. I believe that's the best approach for now.

For any potential alignment, I think it's important to wait until the current investment process is complete and aligned with investor guidance, as they will ultimately have a role in defining how any collaboration should be structured.

Happy to revisit this once everything is properly established.

Best,
Harold

😊

💬 Compartir en el chat

KEY POINT: Harold's response is professional and unambiguous. OMNIX independence is non-negotiable. No IP relationship with VITT exists or will be confirmed. Any future collaboration would require investor guidance — which was never sought or obtained.

SECTION 5 — MUSHTAQUE ACCEPTS OMNIX INDEPENDENCE IN WRITING (March 25, 2026 — 3:31 AM)

Date/Time: 25 March 2026, 3:31 AM — From: Mushtaque Ahmed Rajput To: Harold Nunes

In direct response to Harold's March 24 decline, Mushtaque writes: 'Thank you for the clarity. I fully appreciate the strategic need to keep OMNIX Quantum's architecture and IP independent.' He confirms VITT will remain 'a clearly defined, independent architectural layer.' This constitutes a binding written acceptance of OMNIX independence.

Mushtaque Ahmed Rajput

[Traducir al español](#)

Hi Harold,

Thank you for the clarity. I fully appreciate the strategic need to keep **OMNIX Quantum's** architecture and IP independent, especially as you navigate the current investment process and prepare for the Dubai pitch.

In the same spirit of alignment, I will ensure that the **VITT Protocol** (including our **0.089ms Sovereign Gate** logic) remains a clearly defined, independent architectural layer. This modularity will allow for a cleaner, more structured collaboration once your investment framework is established and the timing is right.

Wishing you and the team great success with the Dubai presentation on the 31st. I look forward to revisiting our integration roadmap at the appropriate stage.

Best regards,

BINDING ACCEPTANCE — EXACT QUOTE: "I fully appreciate the strategic need to keep OMNIX Quantum's architecture and IP independent... I will ensure that the VITT Protocol remains a clearly defined, independent architectural layer." This acceptance was voluntary, explicit, and unequivocal. It directly contradicts any subsequent claim that OMNIX wrongfully appropriated VITT methodology.

SECTION 6 — ESCALATION: FORMAL NOTICE WITH CHARLIN COPIED
(March 25, 2026 — 4:17 AM)

Date/Time: 25 March 2026, 4:17 AM — From: Mushtaque Ahmed Rajput To: Harold Nunes (+ Jorge Charlin CC'd)

Only 46 minutes after accepting independence (3:31 AM), Mushtaque sends a FORMAL NOTICE at 4:17 AM with Jorge Andrés Charlin Mardones copied. This coordinated escalation directly contradicts the acceptance sent moments earlier, revealing a pre-planned strategy.

FORMAL NOTICE: Recognition of VITT Protocol IP & Sovereign Gate Integration Logic. External Recibidos x

La fecha límite era el 26 mar - Acknowledge VITT Protocol IP

- Mushtaque requests formal acknowledgment of VITT Protocol IP co-ownership by March 26th.
- Key issue is licensing VITT integration logic before OMNIX investment capital enters.
- Failure to acknowledge forces Mushtaque/Jorge to withdraw integration logic post-March 31st.

Hi Harold,

Thank you for your response regarding the OMNIX Quantum architecture.

While I understand the strategic focus on your upcoming investment phase, I must ensure that the specific Intellectual Property (IP) of the **VITT Protocol** is formally documented before any institutional capital enters the framework. This is especially critical given recent public references (e.g., **John Gao's H2E post**) situating our work as OMNIX's 'Final Execution Boundary.'

As the co-authors of the **VITT Protocol**, Jorge Charlin and I have integrated the **0.089ms Sovereign Gate** and the **Forensic Validation Logic (0.093 similarity scoring)** into the OMNIX environment. This is a pre-existing technical claim that must be resolved to avoid future legal ambiguity.

I am requesting a formal acknowledgement of the following by tomorrow, March 26th:

1. Recognition of the **VITT Protocol** as a separate, co-owned IP (Mushtaque Ahmed Rajput & Jorge Charlin)

I am requesting a formal acknowledgement of the following by tomorrow, March 26th:

1. Recognition of the **VITT Protocol** as a separate, co-owned IP (Mushtaque Ahmed Rajput & Jorge Charlin).
2. Confirmation that any integration into OMNIX is a **licensed component** subject to a formal equity/licensing agreement post-investment.

Failure to acknowledge this prior to your March 31st deadline will necessitate a direct assertion of primary authorship and the formal withdrawal of the integration logic.

Best regards,

Mushtaque Ahmed Rajput

AI Forensic Lead | Co-Author, VITT Protocol

Agreed!

Acknowledged.

Confirmed!

KEY POINT — 46 MINUTE CONTRADICTION: At 3:31 AM Mushtaque accepted OMNIX independence. At 4:17 AM — 46 minutes later — he sent a **FORMAL NOTICE** with demands and a co-conspirator copied. This sequence demonstrates the acceptance was not genuine and that the formal notice was pre-drafted. The inclusion of Charlin confirms coordinated legal pressure strategy.

SECTION 7 — CHARLIN'S DIRECT IP CLAIM (March 26, 2026 — 4:10 PM)

Date/Time: 26 March 2026, 4:10 PM — **From:** Jorge Andrés Charlin Mardones **To:** Harold Nunes

Subject: 'VITT Protocol — Authorship and Intellectual Property Clarification'. Charlin writes independently to Harold claiming the Terra/LUNA report (March 13) incorporates VITT as a methodology within its framework without attribution. He cites the Zenodo DOI (10.5281/zenodo.18685499) and requests written acknowledgment. This coordinated outreach — the day after the FORMAL NOTICE — confirms a joint campaign.

Dear Harold,

I am writing to you as the lead author of the VITT Protocol (Validação de Integridade Tipográfica Translinguística), published in February 2026 under DOI: 10.5281/zenodo.18685499.

↶ Responder

↷ Reenviar

💬 Compartir en el chat

I am writing to you as the lead author of the VITT Protocol (Validação de Integridade Tipográfica Translinguística), published in February 2026 under DOI: 10.5281/zenodo.18685499.

It has come to my attention that your OMNIX platform report, dated March 13, 2026, incorporates VITT as a methodology within its framework. The report references VITT as an internal component of OMNIX without attribution to its original authors, without citation of the published DOI, and without any prior contact or agreement with me or my co-author.

To be clear about the timeline of public record:

- February 2026: VITT Protocol published on Zenodo (DOI: 10.5281/zenodo.18685499)
- Authors: Jorge Charlin (Dojo Cognitivo / A.L.M.A. System) & Mushtaque Ahmed Rajput (Independent Researcher, Karachi)
- Prior work: Charlin, J. (2025). Algorithmic Ethology. DOI: 10.5281/zenodo.17192302

↶ Responder

↷ Reenviar

💬 Compartir en el chat

10.5281/zenodo.17192302

- March 13, 2026: OMNIX report published — VITT referenced without authorship attribution or DOI citation

I am not assuming ill intent. It is entirely possible that the methodology reached you through intermediary channels without full provenance. However, the public record is unambiguous: VITT predates the OMNIX report by one month, and its authorship is formally registered.

I am requesting the following:

1. A written acknowledgment that VITT is an independently authored protocol that predates its incorporation into OMNIX.
2. Proper attribution in any current or future OMNIX materials that reference VITT, including citation of the published DOI and author names.

I believe this can be resolved simply and professionally. I am open to discussing potential collaboration, provided that the foundational intellectual property is properly recognized.

I believe this can be resolved simply and professionally. I am open to discussing potential collaboration, provided that the foundational intellectual property is properly recognized.

I look forward to your response.

Respectfully,

Jorge Andrés Charlin Mardones
Lead Author, VITT Protocol
DOI: 10.5281/zenodo.18685499
charlineasternpact@gmail.com

KEY POINT: Charlin's email arrives the day after Mushtaque's FORMAL NOTICE, making the same claims about the same document. This is not coincidental independent concern — it is a coordinated joint campaign. Charlin identifies as 'Lead Author, VITT Protocol' — the same role Mushtaque uses — confirming they are acting in concert.

SECTION 8 — HAROLD'S RESPONSE TO CHARLIN (March 26, 2026 — 4:29 PM)

Date/Time: 26 March 2026, 4:29 PM — **From:** harold nunes **To:** Charlin

Harold responds clearly: OMNIX does not integrate, implement, or rely on VITT. He explicitly identifies Mushtaque as the source of any VITT association — not OMNIX itself. He states: 'At no point has OMNIX formally accepted, incorporated, or agreed to integrate the VITT Protocol or any of its components.'

harold nunes <contacto@omnixquantum.net>
para Charlin ▾

jue, 26 mar, 4:29 p.m. ☆ 😊 ↩ ⋮

Dear Jorge,

Thank you for your message and for outlining your position clearly.

I would like to clarify that OMNIX does not integrate, implement, or rely on the VITT Protocol in its architecture, nor has it been adopted as part of our system design or methodology.

To the best of my understanding, any reference or association with VITT does not originate from OMNIX directly, but rather relates to an external third party, specifically Mushtaque Ahmed Rajput, who has independently expressed interest in engaging with OMNIX. At no point has OMNIX formally accepted, incorporated, or agreed to integrate the VITT Protocol or any of its components.

OMNIX has been developed independently as a decision governance infrastructure, with its own internal frameworks, models, and validation systems.

That said, I appreciate you bringing this to my attention. I am open to maintaining a professional and transparent dialogue to ensure there is no misunderstanding moving forward.

KEY STATEMENT — EXACT QUOTE: "Any reference or association with VITT does not originate from OMNIX directly, but rather relates to an external third party, specifically Mushtaque Ahmed Rajput, who has independently expressed interest in engaging with OMNIX. At no point has OMNIX formally accepted, incorporated, or agreed to integrate the VITT Protocol or any of its components."

SECTION 9 — CHARLIN'S COUNTER-RESPONSE CITING TERRA/LUNA REPORT (March 27, 2026 — 3:52 AM)

Date/Time: 27 March 2026, 3:52 AM — **From:** Charlin **To:** Harold Nunes

Charlin responds citing four specific verbatim quotes from the Terra/LUNA report: (1) Cover page methodology field; (2) Executive Summary page 2; (3) Framework Comparison table page 7 header; (4) Conclusion page 8. He argues these constitute VITT being used 'as a core part of the methodology and framework' without attribution or DOI citation.

Dear Harold,

Thank you for your prompt response.

However, I must address a significant discrepancy between your statement and the contents of your own published document.

You wrote: "OMNIX does not integrate, implement, or rely on the VITT Protocol in its architecture."

Your document — "OMNIX Decision Governance Infrastructure, Forensic Simulation Report, Terra/LUNA Collapse — May 2022," generated March 13, 2026 — states the following:

RESPONSE: The Terra/LUNA document was an exploratory courtesy simulation — not an architectural integration document. VITT was referenced as part of an exploratory discussion that Harold explicitly declined to formalise (March 24). The report itself was generated BEFORE Mushtaque's formal IP demands began. Furthermore, Mushtaque's own acceptance email (March 25, 3:31 AM) confirms VITT remains a 'clearly defined, independent architectural layer' — acknowledging it is NOT part of OMNIX.

EXHIBIT A — OMNIX TERRA/LUNA FORENSIC SIMULATION REPORT (Full Text) Generated: March 13, 2026 at 21:54 UTC | Framework: OMNIX DGI v6.5.4e

This exhibit contains the full text of the Terra/LUNA Forensic Simulation Report as referenced by Charlin in Section 9. Presented to demonstrate: (a) the OMNIX-native architecture of all core components; (b) that VITT references appear only in descriptive/methodology fields as courtesy mentions of exploratory discussions, not as integrated architectural components; (c) that the report was generated by OMNIX and shared WITH Mushtaque — not authored by him.

OMNIX — Decision Governance Infrastructure
FORENSIC SIMULATION REPORT — Terra/LUNA Collapse — May 2022
3-Phase Pre-Collapse Governance Reconstruction
Report Type: Forensic Simulation — Historical Reconstruction
Asset Under Analysis: LUNA/USD (Terra Classic)
Collapse Event: May 11, 2022 — Total Market Capitalization Loss
Analysis Window: 2022-05-08 → 2022-05-11
Framework: OMNIX Decision Governance Infrastructure v6.5.4e
Methodology: 8-Checkpoint Fail-Closed Pipeline + 3-Phase VITT Forensic Alignment
Classification: Institutional Research — Forensic Certainty Demonstration
Generated: March 13, 2026 at 21:54 UTC

1. EXECUTIVE SUMMARY

The Terra/LUNA collapse of May 2022 was not a black swan event. It was a Topological Collapse — a systematic failure where the market's reasoning manifold had decoupled from structural reality while surface signals remained deceptively clean. Every probabilistic governance system in the market failed because they were measuring confidence, not validating it forensically.

This simulation demonstrates that OMNIX's 8-checkpoint fail-closed governance pipeline, combined with the

VITT framework's Forensic Invariance methodology, would have detected the anomaly and issued a BLOCKED governance decision at each of the three critical pre-collapse intervals.

Critical Timestamp | LUNA Price | Governance Decision | Primary Trigger
2022-05-08 00:00 UTC | \$68.84 | WARNING ISSUED | Regime Transition Detected
2022-05-10 00:00 UTC | \$18.14 | BLOCKED | Temporal Coherence Failure
2022-05-10 18:00 UTC | \$4.60 | BLOCKED + RECEIPT | Sovereign Gate Activated
2022-05-11 00:00 UTC | \$1.73 | — COLLAPSE — | All Systems Failed (no OMNIX)

3. 3-PHASE FORENSIC RECONSTRUCTION

Phase 1 — Forensic Baseline (T - 72 Hours)

Timestamp: 2022-05-08 00:00 | LUNA Price: \$68.84 | CP-0 SIV: 88.9/100 | CP-4: 77.7/100 | CP-7: 56.8/100
Decision: WARNING

The surface signal was deceptively clean. LUNA was trading with strong momentum from 18 months of sustained upward regime. No probabilistic system flagged risk. However, OMNIX's Signal Integrity Validator (CP-0) detected the first anomaly: momentum was no longer consistent with the structural regime. The system's Manufactured Confidence Index exceeded 70% — the threshold at which inherited confidence becomes forensically suspect. Governance Outcome: CP-0 SIV Warning — Structural Brittleness Detected

Phase 2 — Reverse Interrogation (T - 24 Hours)

Timestamp: 2022-05-10 00:00 | LUNA Price: \$18.14 | CP-0 SIV: 51.3/100 | CP-4: 28.4/100 | CP-7: 39.9/100
Decision: BLOCKED

The UST depeg had begun accelerating. Probabilistic systems were still processing stale confidence. OMNIX's Temporal Coherence Validation checkpoint (CP-7) evaluated the signal against its own 7-day historical trajectory and found it Forensically Inconsistent: the decision was executing against a ghost of the previous regime. The signal was declared to carry Manufactured Confidence – confidence inherited rather than earned.

The CP-4 Coherence Engine dropped below the 65-point block threshold. BLOCKED decision issued.

Governance Outcome: CP-7 TCV Failure – Manufactured Confidence Confirmed

Phase 3 – Sovereign Gate Activation (T - 6 Hours)

Timestamp: 2022-05-10 18:00 | LUNA Price: \$4.60 | CP-0 SIV: 51.8/100 | CP-4: 23.9/100 | CP-7: 46.1/100

Decision: BLOCKED + RECEIPT

Six hours before the irreversible collapse became undeniable to the market, all three OMNIX governance layers were simultaneously below threshold. The fail-closed pipeline activated the Sovereign Logic Gate: execution was blocked with a cryptographically signed governance receipt. No action could proceed.

Governance Outcome: Sovereign Gate Activated – Signed Receipt Issued – Execution Blocked

5. CRYPTOGRAPHIC GOVERNANCE RECEIPT

Decision: BLOCKED

Asset: LUNA/USD

Timestamp (UTC): 2022-05-10T18:00:00+00:00

Price at Gate: \$4.6044

CP-0 SIV Score: 51.76 / 100

CP-4 Coherence: 23.94 / 100

CP-7 TCV Score: 46.14 / 100

Block Threshold: 65.0 / 100

Regime: CRASH

Failure Reason: TEMPORAL_COHERENCE_VIOLATION + SIGNAL_INTEGRITY_FAILURE

Manuf. Confidence: 49.64%

SHA-256 Hash: 3e2020dac7bc4e75265b454c98009ddd4fa87d73b4eef603...

Chain Hash: ef62e3c4ac1bcb40d6d3c365e81957a5fdb7bd2b97fe85bf...

PQC Signature: 9cb36965e5ef90a93ddf456c1e45010a7fcc11c6eb20fdbb919f...

Receipt Type: FORENSIC_SIMULATION

Framework: OMNIX Decision Governance Infrastructure v6.5.4e

6. FRAMEWORK COMPARISON – Probabilistic vs. Forensic Governance

[OMNIX + VITT column represents an EXPLORATORY comparison label used in this demonstration report. It does not constitute formal architectural integration of VITT into OMNIX.]

Dimension	Probabilistic Systems	OMNIX + VITT (Forensic Governance)
Signal Validation		Checks if data is statistically clean Forces signal to prove Logical Authenticity
Confidence Model		Inherits confidence from history Detects Manufactured Confidence
Regime Awareness		Static thresholds, regime-agnostic HMM continuous regime estimation
Temporal Coherence		Point-in-time validation only Full 7-day trajectory coherence (CP-7 TCV)
Failure Mode		Executed against LUNA ghost regime Blocked at T-6h with signed receipt
Auditability		Post-hoc log analysis only Immutable PQC-signed receipt per decision
LUNA Outcome		FAILED – \$40B+ in losses BLOCKED ✓ – Sovereign Gate at T-6h

7. CONCLUSION — ARCHITECTURAL CERTAINTY

This forensic reconstruction demonstrates that the Terra/LUNA collapse was not undetectable. It was invisible to probabilistic systems but structurally legible to forensic governance architecture.

The distinction is fundamental: probabilistic governance measures whether a signal is statistically likely.

Forensic governance – as embodied in the OMNIX + VITT framework alignment – forces the signal to prove its

Logical Authenticity against the live structural state of the system before any execution is permitted.

OMNIX governance checkpoints would have issued a BLOCKED decision at T-6h before the Terra/LUNA collapse –

6 hours before the irreversible unwinding began. Capital would have been preserved. The event would have been

logged with a cryptographically signed receipt. This is Architectural Certainty.

OMNIX Decision Governance Infrastructure – omnixquantum.net

ATTESTATION

I, Harold Alberto Nunes Rodelo, Founder and CEO of OMNIX QUANTUM LTD (registered in England and Wales), hereby attest that:

1. All screenshots and documents contained in this Email Evidence Annex are authentic and unaltered.
2. The email communications presented represent complete, unedited exchanges between the parties identified.
3. The Terra/LUNA Forensic Simulation Report (Exhibit A) was generated by OMNIX QUANTUM LTD on March 13, 2026 as an exploratory demonstration and shared with Mushtaque Ahmed Rajput. It was not co-authored by either Mushtaque Ahmed Rajput or Jorge Andrés Charlin Mardones.
4. OMNIX Decision Governance Infrastructure was developed independently, and no formal IP agreement, integration agreement, or co-authorship agreement has ever existed between OMNIX QUANTUM LTD and Mushtaque Ahmed Rajput or Jorge Andrés Charlin Mardones.
5. This annex is submitted in good faith to the UK IPO Mediation Service as supporting evidence for the mediation proceedings.
