

Mediation Submission Package

OMNIX QUANTUM LTD · omnixquantum.net

Submitted: April 19, 2026 · mediation@ipo.gov.uk

1. PARTIES TO THE DISPUTE

REQUESTING PARTY	OPPOSING PARTY
Harold Alberto Nunes Rodelo Founder & Director — OMNIX QUANTUM LTD United Kingdom omnixquantum.net	Mushtaque Ahmed Rajput VITT Contact made via LinkedIn message

2. NATURE OF THE DISPUTE

On April 19, 2026, the Requesting Party received a written message via LinkedIn from the Opposing Party containing formal accusations of intellectual property theft, threats to contact investors, regulatory bodies, and the broader AI governance community, and demands for the removal of content from omnixquantum.net. The Opposing Party claims that the Requesting Party incorporated VITT methodology and forensic invariance techniques into the OMNIX Quantum platform without authorisation, and that a forensic simulation report was co-created and subsequently altered to remove the Opposing Party's name.

The Requesting Party disputes these claims entirely. OMNIX Quantum was built independently beginning July 2025. The Terra/LUNA forensic simulation was created solely by the Requesting Party on March 13, 2026. A temporary joint experiment label was added to one PDF and removed on March 18, 2026 — proactively, prior to any complaint. No VITT methodology, code, or intellectual property exists anywhere in the OMNIX codebase.

3. DISPUTE TYPE — IPO CATEGORIES APPLICABLE

IP Category	Relevance to This Case
Ownership / Entitlement	Opposing Party claims entitlement to outputs created independently by the Requesting Party. Full and exclusive ownership belongs to Harold Nunes / OMNIX QUANTUM LTD.
Copyright	Opposing Party claims the forensic simulation report constitutes their original work. Requesting Party demonstrates prior independent creation via cryptographic git timestamps.
Trade Secrets	Opposing Party claims proprietary VITT methodology was incorporated into OMNIX. A full repository search confirms zero VITT content in the codebase.

4. CHRONOLOGICAL GIT EVIDENCE (CRYPTOGRAPHICALLY VERIFIED)

The following timeline is derived from the cryptographic SHA-1 commit history of the OMNIX Quantum repository. These hashes are tamper-evident and independently verifiable by any forensic software engineer with repository access.

DATE	COMMIT	EVENT	SIGNIFICANCE
Jul 13, 2025	4b9ab293	OMNIX repository initialised. Create main.py — project starts from zero.	OMNIX built 8 months before any VITT involvement.
Mar 13, 2026 21:55 UTC	08879d68	Add forensic simulation report for Terra-LUNA collapse. Files created: · OMNIX_LUNA_Forensic_Simulation_May2022.pdf · generate_luna_simulation.py (1,073 lines) Author: madridpep3	Created solely by Harold Nunes. File header line 1: "OMNIX Forensic Simulation" Zero VITT mention.
Mar 18, 2026 09:09 UTC	ceca9500	Task #19: Correct LUNA PDF — remove internal version and regenerate.	Harold proactively removed experiment label. Before any complaint received.
Apr 10, 2026 08:28 UTC	dc927867	Remove references to VITT from documentation and scripts. 4 files modified.	VITT appears in git ONLY in removal commits. Zero commits ever added VITT methodology.

5. CRITICAL TECHNICAL FINDINGS

Command:
`git log --all | grep -i 'VITT'`

Result: Returns exactly 2 commits — both April 10, 2026 — both titled "Remove references to VITT from project documentation and scripts." There is no commit that ADDS VITT. VITT exists in git history exclusively in removal operations.

File header of
`generate_luna_simulation.py`
(commit 08879d68 · Mar 13 2026)

Line 1: "OMNIX Forensic Simulation — Terra/LUNA Collapse May 2022"
Line 2: "Generates a professional PDF demonstrating how OMNIX governance"
Line 3: "checkpoints would have blocked execution before the catastrophic collapse."
No VITT. No external methodology. Pure OMNIX architecture from line 1.

Command:
`grep -r 'vitt' omnix_web/
omnix_dashboard/
omnix_core/ omnix_services/`

Result: 0 results. Zero VITT references in any Python, JavaScript, HTML or template file across the entire live application and website (omnixquantum.net).

6. SUMMARY OF VERIFIED FACTS

- ✓ **FACT 1** OMNIX Quantum was built from scratch starting July 13, 2025 — eight months before any collaboration with the Opposing Party.
- ✓ **FACT 2** The Terra/LUNA forensic simulation was created solely by Harold Nunes on March 13, 2026. The source file header reads "OMNIX Forensic Simulation" with no reference to VITT.
- ✓ **FACT 3** The label "OMNIX + VITT Forensic Alignment" was applied to one PDF as a temporary experiment label during a voluntary joint test. It was never part of the codebase or any live deployment.
- ✓ **FACT 4** The Requesting Party proactively removed the label on March 18, 2026 — before receiving any complaint from the Opposing Party.
- ✓ **FACT 5** A systematic removal of all VITT references was completed April 10, 2026. The removal commits are themselves public and timestamped, demonstrating good faith.
- ✓ **FACT 6** No VITT methodology, function, algorithm, or IP exists anywhere in the OMNIX codebase. Verifiable by any independent forensic analyst with repository access.

7. OUTCOME SOUGHT THROUGH MEDIATION

1. Formal acknowledgement that OMNIX Quantum was built independently, prior to and without incorporation of any VITT methodology or intellectual property.
 2. Cessation of all accusations of IP theft directed at OMNIX QUANTUM LTD and its founder.
 3. Cessation of threats to contact investors, regulatory bodies, or the public with unsubstantiated claims.
 4. A mutual written agreement confirming the above, held in confidence per IPO mediation terms.
-

8. MEDIATION SESSION PREFERENCE

Format	Online (video call) — preferred
Duration	1–2 hours
Language	English
Availability	Flexible — any date from May 2026 onward
Location	Online preferred; IPO Newport Office acceptable

This submission is provided in good faith for the purpose of IP mediation under the UK Intellectual Property Office Mediation Service. All technical evidence is cryptographically verifiable. The Requesting Party is willing to provide repository access to any accredited forensic analyst appointed by the IPO.
