

OMNIX QUANTUM

OMNIX x VELOS

CHANNEL PARTNER AGREEMENT

Version 2.0 | Confidential

Date: 03/04/ 2026

Between: Harold Nunes / OMNIX Decision Governance ("OMNIX")

And: Naimat Khan / Velos ("Velos")

1. PURPOSE

This agreement establishes the terms of a bilateral commercial partnership between OMNIX and Velos. Both systems remain fully independent entities. This agreement governs referral commissions, co-positioning, and the basis for future commercial collaborations -- it does not create a joint venture, equity arrangement, shared intellectual property, or employment relationship of any kind.

2. INTELLECTUAL PROPERTY & INDEPENDENCE

- OMNIX retains 100% ownership of its governance logic, algorithms, pipeline architecture, and infrastructure.

- Velos retains 100% ownership of its execution gateway UI/UX, logic, and infrastructure.

- Any technical integration is limited exclusively to an API bridge. No source code, algorithms, or proprietary logic is transferred or shared.

3. EXCLUSIVITY

Zero exclusivity. Both parties remain fully free to integrate with, partner with, or sell to any third party independently and without prior notice.

4. CO-POSITIONING

In joint materials, OMNIX is presented as the upstream decision governance layer and Velos as the downstream execution layer -- a complementary architecture where OMNIX is the admissibility engine and Velos is the authorized execution mechanism. Neither brand shall be subordinated to the other in sales materials without prior written consent. All joint materials require approval from both parties before distribution.

5. BRAND CONTROL

Neither party may use the other's name, logo, trademark, reputation, or identity in public materials, presentations, client proposals, social media, or any external communication without prior written authorization from the owning party. This includes referring to the other party as a 'partner,' 'ally,' or any term implying a formal association in public channels. Any brand use authorization is revocable at any time via written notice.

6. PRICING CONTROL -- OMNIX

OMNIX retains final and exclusive approval over pricing, discounts, and contractual terms related to its services in all contexts -- including joint sales, bundled packages, or any proposal involving both systems. Velos may not quote, negotiate, or commit to OMNIX pricing without prior written authorization from Harold Nunes. Any proposal including OMNIX services must be reviewed and approved by OMNIX before being presented to a client.

7. NON-CIRCUMVENTION

For a period of 12 months from the date of any documented introduction, neither party shall contact, negotiate with, or close agreements directly with clients introduced by the other party without the active participation of the introducing party. This clause survives termination of this agreement. Violation entitles the affected party to claim 100% of the commission corresponding to the contract signed.

8. COMMISSIONSTRUCTURE--SYMMETRIC10%

8.1 When either party refers a net-new client to the other, the receiving party pays 10% of the monthly contract value for the first 12 months.

8.2 Commission table:

When Velos refers client to OMNIX (OMNIX pays Velos)		
OMNIX Plan	Monthly Value	Commission to Velos
Advisory	\$8,000/month	\$800/month
Enterprise	\$20,000/month	\$2,000/month
Enterprise	\$35,000/month	\$3,500/month

When OMNIX refers client to Velos (Velos pays OMNIX)		
Velos Plan	Monthly Value	Commission to OMNIX
Tier 1 -- Institutional Node	\$4,500/month	\$450/month
Tier 2 -- Enterprise Cluster	Confirmed at closing	10% of that value

8.3 Commissions apply to the first 12 months only. No commission on renewals unless a new documented introduction occurred.

8.4 Commission activates only when the referred client signs AND completes their first payment.

8.5 Attribution window: 90 calendar days from the documented introduction.

8.6 Attribution determined by company name. If the same name appears in both pipelines, both parties negotiate in good faith before any commission is activated.

9. DEALCLOSING&CONTRACTCONTROL

Each party is solely responsible for closing, negotiating, and signing its own contracts. The introducing party has no authority to sign or commit to terms on behalf of the other party. Any joint proposal must receive express approval from both parties before being presented to a client.

10. ADDITIONAL COLLABORATION MODELS

10.1 Joint bundled sales: OMNIX and Velos may be offered as a combined solution. Pricing, revenue split, and responsibilities shall be defined in a separate agreement per use case.

10.2 API integration license: Velos may access the OMNIX API under a fixed monthly license fee. Terms and amounts shall be defined in a separate technical-commercial agreement.

10.3 Co-developed use cases: No joint use case -- including the proposed BTC/USD case -- shall be launched, presented to clients, or commercialized without both parties first signing a specific agreement. Mention in this document does not constitute launch authorization.

None of these models generate financial obligations until both parties sign the specific corresponding agreement.

11. LIABILITYSEPARATION

Each party is solely responsible for its own system, performance, availability, security, outcomes, and regulatory obligations. OMNIX assumes no liability for failures or claims arising from Velos systems. Velos assumes no liability for failures or claims arising from OMNIX systems. In no event shall either party be liable for indirect damages, loss of revenue, or consequential damages arising from this partnership.

12. TRANSPARENCY&REPORTING

12.1 Written notification within 48 hours of closing a contract where a commission applies.

12.2 Monthly report by the 5th of each month listing all active commission obligations.

12.3 Commission payments within 30 days of the monthly report confirming the client's first payment.

13. SYSTEMACCESSCONTROL

OMNIX: Access granted exclusively by Harold Nunes. Velos may not provision, activate, demo, or represent OMNIX access without prior written authorization.

Velos: Access granted exclusively by Naimat Khan. OMNIX may not provision, activate, demo, or represent Velos access without prior written authorization.

Unauthorized use of either system constitutes a material breach.

14. GOVERNINGLAW&JURISDICTION

This agreement is governed by the principles of international commercial law. Any dispute not resolved within 30 days shall be submitted to binding arbitration administered by the London Court of International Arbitration (LCIA). Arbitration shall be conducted remotely in English. The arbitral award is final and binding on both parties.

15. TERM&TERMINATION

Valid for 12 months from signing, with automatic renewal unless either party provides 30 days written notice of termination. Pending commissions and non-circumvention obligations survive termination and remain enforceable.

16. ENTIRE AGREEMENT

This document supersedes all prior emails, verbal discussions, and informal arrangements. Amendments require written consent from both parties.

SIGNATURES

OMNIX Decision Governance

Name: Harold Nunes

Date: 03/04/2026

Signature: Harold Nunes

Velos

Name: Naimat Khan

Date: 03/04/2026

Signature: Naimat

Both parties acknowledge having read, understood, and agreed to all terms above.
