

SUPPLEMENT TO CLAUSE 10.1

Joint Bundled Commercial Agreement

OMNIX QUANTUM LTD Incorporated in England & Wales ("OMNIX")	VELOS Technology Execution Partner ("Velos")
--	---

Effective Date: [DATE TO BE INSERTED]

Pursuant to Master Partnership Agreement v2.0 — dated 03 April 2026

CONFIDENTIAL — FOR EXECUTION ONLY — NOT FOR DISTRIBUTION

1. PURPOSE

This Supplement governs the commercial terms applicable exclusively to Joint Bundled Sales — defined as transactions in which OMNIX and Velos present a combined technology stack to a single enterprise client, comprising the OMNIX Admissibility Governance Layer and the Velos T=0 Execution Enforcement Layer.

This Supplement does not modify, replace, or override any other term of the Agreement, including independent referral commissions governed by Clause 5.

2. JOINT STACK ARCHITECTURE

2.1 The joint stack consists of two distinct and complementary layers:

OMNIX Governance Layer: 11-checkpoint admissibility engine with post-quantum cryptographic receipts (Dilithium-3), governing decision validity prior to execution.

Velos Execution Layer: T=0 physical enforcement boundary providing real-time execution halt or authorisation based on OMNIX admissibility output.

2.2 Both layers shall be disclosed to the client as distinct components of the joint stack. Velos shall not be white-labeled or obscured. Velos cryptographic execution receipts shall be explicitly visible in client-facing logs and audit trails.

2.3 OMNIX retains full ownership of its Governance Layer IP. Velos retains full ownership of its Execution Layer IP. No joint ownership arises from this Supplement.

2.4 Pre-Execution Governance Authority: OMNIX operates as a pre-execution governance layer. Where integrated, Velos shall enforce OMNIX veto decisions and shall not execute any action that has been blocked or rejected by OMNIX. The OMNIX admissibility output is binding on the Velos execution boundary for all joint stack deployments.

3. COMMERCIAL TRACKS

Track A — Unified Route

3.1

When the client procures the joint stack through a single contract and single invoice, OMNIX acts as the prime contracting party. OMNIX issues all invoicing and maintains the primary client relationship and account ownership.

3.2

Revenue is distributed on a **70/30 basis**: 70% to OMNIX, 30% to Velos, calculated on the total contract value invoiced to the client.

3.3

OMNIX retains full discretion to set the final contract price to the client. The 30% Velos share is calculated on the total invoiced amount regardless of the pricing tier selected by OMNIX.

3.4

The 70/30 split is an internal arrangement between the Parties and shall not be disclosed to the client.

3.5

OMNIX shall transfer Velos's share within **15 business days** of receipt of client payment.

Pricing Tier	Total Bundle	OMNIX (70%)	Velos (30%)
Institutional Node	\$25,000 / month	\$17,500 / month	\$7,500 / month
Enterprise Cluster	\$55,000 / month	\$38,500 / month	\$16,500 / month
Sovereign Stack	\$95,000 / month	\$66,500 / month	\$28,500 / month

Track B — Modular Route

3.6

When the client procures governance and execution layers under separate contracts, Velos contracts directly with the client for the execution layer at a flat infrastructure fee of **\$4,500 USD per month per enterprise node**.

3.7

OMNIX contracts directly with the client for the governance layer at its applicable pricing tier. No revenue sharing between the Parties applies under this track.

3.8

Under Track B, OMNIX retains 100% of its contract value and Velos retains 100% of its \$4,500 monthly fee.

4. OPERATIONAL GOVERNANCE

4.1 Route Selection:

The applicable commercial track is determined jointly by both Parties based on the client's procurement preference. Neither Party may unilaterally designate a track without the other Party's written confirmation.

4.2 Mutual Authorisation:

No joint stack deployment may proceed under either track without prior written confirmation from both Parties. The OMNIX Governance Layer may not be activated in a Velos environment, and the Velos Execution Layer may not be deployed against OMNIX infrastructure, without mutual sign-off.

4.3 Modular Route Client Engagement:

Velos shall notify and obtain written approval from OMNIX prior to engaging any client under the Modular Route involving the joint stack. No direct client contract under Track B may be executed without OMNIX written approval.

4.4 Pipeline Transparency:

Both Parties agree to maintain a shared pipeline log of active and prospective joint stack opportunities, updated within 5 business days of any material development.

4.5 Architectural Transparency:

In all Unified Route (Track A) deployments, OMNIX agrees that the Velos Execution Layer shall remain architecturally transparent, and Velos shall be explicitly identified to the end-client as the terminal enforcement provider. This transparency is a required condition for the client's cyber-insurance underwriting and audit trail validity.

5. LIABILITY

5.1

Each Party shall be solely responsible for its own systems, outputs, and performance under this Supplement. OMNIX assumes no liability for the performance or failure of the Velos Execution Layer. Velos assumes no liability for the performance or failure of the OMNIX Governance Layer.

5.2

No joint liability is created under this Supplement. Each Party's liability to the client for its respective layer is governed solely by its own direct contractual arrangements with that client.

5.3

In the Unified Route, OMNIX as prime contractor bears contractual liability to the client for the total bundled offering. OMNIX shall include appropriate back-to-back liability provisions in its agreement with Velos for the execution layer component.

6. BRAND AND MARKETING

6.1

Neither Party may use the name, brand, logo, trademarks, or technology references of the other Party in any public, client-facing, or marketing material without prior written consent from the other Party.

6.2

Any co-branded materials, joint press releases, or public references to the partnership must be approved in writing by both Parties prior to publication or distribution.

7. NON-EXCLUSIVITY

7.1

This Supplement is non-exclusive. Both Parties remain free to engage with other partners, clients, or technology integrations independently, provided that such engagements do not breach the confidentiality obligations of the Agreement.

7.2

Neither Party acquires any right of first refusal, exclusivity, or preferential treatment in any market or territory as a result of this Supplement.

8. TERM AND TERMINATION

8.1

This Supplement shall remain in force for the duration of the Agreement unless terminated earlier by mutual written agreement of both Parties with 60 days written notice.

8.2

Termination of this Supplement does not affect the validity or enforceability of the Agreement or any independent arrangements thereunder.

9. GOVERNING LAW

This Supplement is governed by the laws of England and Wales. Any disputes arising from this Supplement shall be subject to the exclusive jurisdiction of the courts of England and Wales.
