

OMNIX QUANTUM

OMNIX QUANTUM -- Business Model Canvas

Decision Governance Infrastructure | Eureka Dubai GCC 2026 Semifinalist | Pre-Seed \$500K

KEY PARTNERS	KEY ACTIVITIES	VALUE PROPOSITION	CUSTOMER RELATIONSHIP	CUSTOMER SEGMENTS
- Regulatory & Compliance - ADGM (target ecosystem) - DIFC (expansion target) - Technology - Railway (cloud infra) - Google Gemini 2.5 Flash - OpenAI GPT-4o - PostgreSQL / Redis - Strategic Pipeline - Prop trading firms (pilots) - Trading platforms (API) - Institutional sales network	- 8-Checkpoint governance engine - Shadow portfolio analysis - PQC-signed audit trail generation - API integration for enterprise clients - Compliance & telemetry monitoring - Multi-vertical domain adaptation	"Preventing costly mistakes before they happen." OMNIX is Decision Governance Infrastructure -- the control layer between signals and execution. Fail-closed by design: Block first, act only with confirmed edge across 8 independent checkpoints. What clients get: Capital protected before loss Full PQC-signed audit trail Designed for MiCA + ADGM frameworks Sharia governance assessment 100% veto accuracy (validated) Key differentiator: NOT a trading system. The governance layer ABOVE it.	- Structured onboarding + risk config - Technical integration support - SLA-based uptime (99.5% target) - Governance review sessions - Shadow Portfolio learning loop - High switching cost = retention	- PRIMARY -- B2B Institutional: - Prop trading firms (200+ ADGM) - Regulated crypto hedge funds - Trading platforms (MiCA pressure) - Family offices (MENA/Asia) - SECONDARY -- B2C: - Advanced independent traders - High-net-worth self-directed - FUTURE VERTICALS: - Supply chain (Y2-3) - Credit / insurance (Y3+) - Autonomous systems (Y3+)
COST STRUCTURE			REVENUE STREAMS	
- Infrastructure & cloud hosting (Railway/PostgreSQL) - AI API costs (Gemini, OpenAI, Anthropic) - Legal + regulatory + Sharia compliance assessment - Sales & business development (outreach + events) - First technical hire (post-funding) - Security audit -- PQC third-party validation			- Enterprise pilot: \$10K-\$15K/month - Enterprise full: \$20K-\$35K/month - API per-validation: \$0.01-\$0.05/call - B2C SaaS: \$149-\$499/month - White-label engine: \$100K+ setup - TAM \$5.4B SAM \$540M Break-even Q4 2026
