

GOVERNANCE DECISION REPORT

CLIENT

Meridian Capital LLC

CLIENT ID

MCC-0047

REPORTING PERIOD

January 1 – March 24, 2026 (Q1)

CONTRACT TIER

Enterprise — Governance API + Full Audit Trail

REPORT DATE

March 24, 2026

PREPARED BY

OMNIX Governance Infrastructure — Automated Report Engine

This report is generated automatically by the OMNIX Governance Infrastructure and contains cryptographically signed decision records for the reporting period. All decisions are publicly verifiable at omnixquantum.net/verify.

STRICTLY CONFIDENTIAL — DO NOT DISTRIBUTE

01. EXECUTIVE SUMMARY

During Q1 2026, OMNIX processed 1,847 governance evaluations submitted by Meridian Capital LLC. Of these, 1,312 (71.0%) were approved, 389 (21.1%) were blocked, and 146 (7.9%) returned a HOLD recommendation. No evaluation bypassed the 8-checkpoint pipeline. Every decision carries a cryptographic signature and is independently verifiable.

1,847	1,312	389	\$4.2M
Evaluations Processed	Decisions Approved	Decisions Blocked	Est. Exposure Protected

* "Est. Exposure Protected" = aggregate notional value of blocked decisions. Not a guarantee of loss prevention.

02. CHECKPOINT PIPELINE — WHAT EACH GATE CHECKED

Every decision passes through 8 independent checks in sequence. If any check fails, the decision is immediately blocked — no exceptions.

Gate	What it checks	Evaluated	Passed	Failed	Pass Rate
CP-1	Market conditions — is the regime stable?	1,847	1,702	145	92.1%
CP-2	Volatility — is risk within acceptable limits?	1,702	1,620	82	95.2%
CP-3	Liquidity — can the position be exited safely?	1,620	1,588	32	98.0%
CP-4	Drawdown — is the portfolio below loss limits?	1,588	1,541	47	97.0%
CP-5	Monte Carlo — worst-case scenario analysis	1,541	1,468	73	95.3%
CP-6	Custom domain validation — configurable per client 	—	—	—	—
CP-7	Signal coherence — do all indicators agree?	1,468	1,401	67	95.4%
CP-8	Multi-agent consensus — unanimous AI agreement	1,401	1,312	89	93.6%

 **CP-6 — Configurable Checkpoint:** This slot is reserved for domain-specific validation logic defined by you. Enterprise clients can activate CP-6 to enforce custom rules (concentration limits, sector exposure caps, counterparty restrictions, etc.) that run inside the governance pipeline before every decision. Contact your account manager to configure.

03. DECISION LOG — SAMPLE RECORDS (Q1 2026)

A sample of 10 decisions from the period. Each has a unique Receipt ID — verifiable at omnixquantum.net/verify by any third party.

Receipt ID	Timestamp (UTC)	Type	Decision	Gates OK	Secured by
OMNIX-MCC-00471	2026-01-08 09:14	Credit	APPROVED	8 of 8	Post-quantum ✓
OMNIX-MCC-00472	2026-01-08 11:02	Equity	BLOCKED	3 of 8	Post-quantum ✓
OMNIX-MCC-00489	2026-01-09 14:33	Crypto	APPROVED	8 of 8	Post-quantum ✓

OMNIX-MCC-00521	2026-01-12 08:19	FX	HOLD	6 of 8	Post-quantum ✓
OMNIX-MCC-00534	2026-01-14 16:45	Credit	BLOCKED	2 of 8	Post-quantum ✓
OMNIX-MCC-00602	2026-01-21 10:08	Equity	APPROVED	8 of 8	Post-quantum ✓
OMNIX-MCC-00741	2026-02-03 13:27	Real Est.	APPROVED	8 of 8	Post-quantum ✓
OMNIX-MCC-00899	2026-02-18 09:55	FX	BLOCKED	4 of 8	Post-quantum ✓
OMNIX-MCC-01102	2026-03-05 15:12	Credit	APPROVED	8 of 8	Post-quantum ✓
OMNIX-MCC-01847	2026-03-24 08:01	Equity	HOLD	7 of 8	Post-quantum ✓

Full log: 1,847 records. Verify any receipt at omnixquantum.net/verify/{receipt_id}

04. SECURITY — HOW DECISIONS ARE PROTECTED

Every governance decision is locked with cryptographic signatures that make it impossible to alter the record after the fact. The technology used is quantum-resistant — designed to remain secure even as computing power increases dramatically in coming years.

Security element	Detail	What this means for you
Signature type	Dilithium-3 (post-quantum)	Tamper-proof. Cannot be forged.
Key protection	ML-KEM-768 encryption	Communications cannot be intercepted.
Tamper detection	SHA-256 content hash	Any change to a receipt is instantly detectable.
Audit chain	Rolling Merkle root	Full history is mathematically linked — no gaps.
Q1 receipts signed	1,847 of 1,847	100% coverage. No decision left unprotected.
Independent verify	omnixquantum.net/verify	Any third party can verify — without asking OMNIX.

05. WHY DECISIONS WERE BLOCKED — Q1 BREAKDOWN

Of the 389 blocked decisions, here is what triggered each block. Understanding this helps you improve signal quality and reduce unnecessary blocks over time:

What triggered the block	Blocked	On Hold	Gate	What it detected
Volatile market conditions	112	38	Gate 2	Volatility index exceeded threshold
Insufficient liquidity	89	22	Gate 3	Position could not be safely exited
Portfolio loss limit reached	67	31	Gate 4	Drawdown exceeded maximum allowed
Adverse simulation outcome	73	29	Gate 5	Monte Carlo showed >2.5% value-at-risk
AI agents disagreed	48	26	Gate 8	Agent consensus below 65%
TOTAL	389	146	—	—

06. REGULATORY ALIGNMENT

OMNIX is designed to meet the requirements of the frameworks your institution is most likely to face. This is not a certification — it means the architecture was built with these rules in mind from day one.

Regulation / Framework	Status	What it covers
NIST AI Risk Management Framework	Aligned	Risk governance across the full AI lifecycle
ISO/IEC 42001 — AI Management	Aligned	Decision traceability and documented audit trail
EU AI Act (High-Risk AI)	Designed for	Fail-closed architecture, human oversight support
ADGM Regulatory Sandbox (Abu Dhabi)	Designed for	Compliance-ready structure for GCC markets
SOC 2 Security Principles	Aligned	Access control, logging, cryptographic integrity

07. RECOMMENDED ACTIONS — Q2 2026

- Improve FX signal quality.** FX decisions had the highest HOLD rate (14.2%). Adding intraday spread and order flow data would reduce inconclusive results.
- Switch to real-time notifications.** Your current integration polls our API. Switching to push notifications cuts response time from ~800ms to ~120ms.
- Activate counterfactual tracking.** Shows what would have happened if a blocked decision had been executed — giving you hard data on the value of each block.
- Quarterly review call.** A 45-minute calibration session to fine-tune risk thresholds to your specific portfolio.

LEGAL DISCLAIMER

This report is provided exclusively to Meridian Capital LLC under the executed Governance Services Agreement. OMNIX does not provide financial advice or investment recommendations. Exposure protection estimates are based on notional values provided by the client and do not guarantee loss prevention. All receipts are independently verifiable at omnixquantum.net/verify. Unauthorized distribution is prohibited.
