

GOVERNANCE DECISION REPORT

CLIENT

CLIENT ID

REPORTING PERIOD

CONTRACT TIER

REPORT DATE

PREPARED BY

This report is generated automatically by the OMNIX Governance Infrastructure and contains cryptographically signed decision records for the reporting period. All decisions are backed by post-quantum signatures (Dilithium-3) and publicly verifiable at omnixquantum.net/verify.

STRICTLY CONFIDENTIAL — DO NOT DISTRIBUTE

01. EXECUTIVE SUMMARY

During Q1 2026, OMNIX processed **1,847 governance evaluations** submitted by Meridian Capital LLC through the External Governance API. Of these, **1,312 (71.0%) were approved**, **389 (21.1%) were blocked**, and **146 (7.9%) returned a HOLD** recommendation pending additional signal confirmation. No evaluation bypassed the 8-checkpoint pipeline. All decisions carry a Dilithium-3 post-quantum signature and are independently verifiable.

1,847	1,312	389	\$4.2M
Evaluations Processed	Decisions Approved	Decisions Blocked	Est. Capital Protected

** "Est. Capital Protected" represents the aggregate notional exposure of blocked decisions during the period, calculated from signal inputs provided by the client. This is not a guarantee of loss prevention.*

02. CHECKPOINT PIPELINE PERFORMANCE

Every evaluation submitted to OMNIX passes through 8 independent checkpoints in sequence. A single checkpoint failure triggers a BLOCKED decision with full audit trail. The table below shows aggregate checkpoint performance for Q1 2026:

Checkpoint	Name	Evaluations	Pass	Fail	Pass Rate
CP-1	Market Regime Validation	1,847	1,702	145	92.1%
CP-2	Volatility Threshold Gate	1,702	1,620	82	95.2%
CP-3	Liquidity Depth Assessment	1,620	1,588	32	98.0%
CP-4	Drawdown Risk Guard	1,588	1,541	47	97.0%
CP-5	Monte Carlo VETO Engine	1,541	1,468	73	95.3%
CP-7	Temporal Coherence Validator	1,468	1,401	67	95.4%
CP-8	Ensemble Consensus Weighting	1,401	1,312	89	93.6%
	Multi-Agent Governance (exit)	—	—	—	—

03. DECISION LOG — SAMPLE RECORDS (Q1 2026)

The following table shows a representative sample of 10 governance decisions from the reporting period. Each record is cryptographically signed. Full logs are available via the API audit endpoint `/api/governance/audit/MCC-0047` with your API key.

Receipt ID	Timestamp (UTC)	Domain	Decision	CP Passed	Signature
OMNIX-MCC-00471	2026-01-08 09:14:22	Credit	APPROVED	8/8	Dilithium-3 ✓
OMNIX-MCC-00472	2026-01-08 11:02:45	Equity	BLOCKED	3/8	Dilithium-3 ✓
OMNIX-MCC-00489	2026-01-09 14:33:11	Crypto	APPROVED	8/8	Dilithium-3 ✓
OMNIX-MCC-00521	2026-01-12 08:19:04	FX	HOLD	6/8	Dilithium-3 ✓

OMNIX-MCC-00534	2026-01-14 16:45:30	Credit	BLOCKED	2/8	Dilithium-3 ✓
OMNIX-MCC-00602	2026-01-21 10:08:17	Equity	APPROVED	8/8	Dilithium-3 ✓
OMNIX-MCC-00741	2026-02-03 13:27:55	Real Est.	APPROVED	8/8	Dilithium-3 ✓
OMNIX-MCC-00899	2026-02-18 09:55:03	FX	BLOCKED	4/8	Dilithium-3 ✓
OMNIX-MCC-01102	2026-03-05 15:12:44	Credit	APPROVED	8/8	Dilithium-3 ✓
OMNIX-MCC-01847	2026-03-24 08:01:19	Equity	HOLD	7/8	Dilithium-3 ✓

Full audit log: 1,847 records available via API. Each receipt verifiable at omnixquantum.net/verify/{receipt_id}

04. CRYPTOGRAPHIC AUDIT TRAIL

All governance decisions generated during the reporting period are cryptographically secured using post-quantum algorithms. The integrity of the audit trail is maintained through a rolling Merkle root updated with each new receipt.

Parameter	Value
Signature Algorithm	Dilithium-3 (NIST-standardized post-quantum)
Key Encapsulation	ML-KEM-768 (Kyber-768) via HKDF
Content Hash Algorithm	SHA-256
Timestamp Standard	RFC 3161-style internal timestamping
Merkle Root (Q1 2026)	7f3a9c2e1b4d8f6a0e5c3b7d9f2a4e8c1b3d5f7a...
Receipts Signed (Q1)	1,847
Receipts Verified OK	1,847 (100%)
Independent Verify URL	omnixquantum.net/verify/{receipt_id}

05. GOVERNANCE RISK ANALYSIS — Q1 2026

The following risk breakdown is derived from signal inputs provided by Meridian Capital LLC across the reporting period. Categories reflect the primary failure mode identified by the OMNIX pipeline for each blocked or held decision.

Risk Category	Blocked	HOLD	Avg CP Failed	Primary Signal
Volatility / Regime Shift	112	38	CP-2	Volatility index > threshold
Liquidity Gap	89	22	CP-3	Order depth insufficient
Drawdown Limit Breach	67	31	CP-4	Max drawdown reached
Monte Carlo Adverse Path	73	29	CP-5	VaR > 2.5% at 99th pct
Ensemble Divergence	48	26	CP-8	Agent consensus < 0.65
TOTAL	389	146	—	—

06. COMPLIANCE & GOVERNANCE FRAMEWORK ALIGNMENT

OMNIX governance infrastructure is designed in alignment with the following frameworks and regulatory considerations. Alignment does not constitute certification or compliance guarantee.

Framework	Alignment Level	Notes
NIST AI Risk Management Framework (AI RMF)	Aligned	GOVERN, MAP, MEASURE, MANAGE functions covered
ISO/IEC 42001 — AI Management Systems	Aligned	Decision traceability and audit trail
EU AI Act (High-Risk AI Systems)	Designed for	Fail-closed architecture, human oversight hooks
ADGM Regulatory Sandbox Framework	Designed for	Abu Dhabi compliance-ready architecture
SOC 2 Security Control Principles	Aligned	Access control, audit logging, cryptographic integrity

07. RECOMMENDATIONS FOR Q2 2026

- Increase signal granularity for FX domain.** FX evaluations showed the highest HOLD rate (14.2%). Providing intraday spread and order flow data as additional signals would reduce ambiguous decisions.
- Enable real-time webhook notifications.** Your current integration polls the API. Switching to the webhook model reduces decision latency from ~800ms to ~120ms.
- Activate the Shadow Portfolio module.** This tracks counterfactual outcomes for blocked decisions, providing quantified evidence of governance value over time.
- Schedule quarterly governance review call.** We recommend a 45-minute session to review checkpoint threshold calibration for your specific risk profile.

LEGAL DISCLAIMER

This report is generated automatically by the OMNIX Decision Governance Infrastructure and is provided exclusively to Meridian Capital LLC under the terms of the executed Governance Services Agreement. The figures contained herein reflect governance pipeline outputs based on signals provided by the client. OMNIX does not

provide financial advice, investment recommendations, or trading signals. Capital protection estimates are illustrative and based on notional exposure inputs. Past governance performance does not guarantee future outcomes. All cryptographic receipts are independently verifiable at omnixquantum.net/verify. Unauthorized distribution of this report is prohibited.
